

# TSOne Construction Logistics

## Why Choose TRIOSE?

TRIOSE's Construction Logistics program applies proven "best practice" supply chain solutions and saving strategies to the construction process.

TRIOSE coordinates construction shipments, making sure each component arrive on time and at the best possible price, saving hospitals time and money. Additional benefits include: optimized site productivity, reduced congestion on site, optimization resources and elimination of loss and damage to materials.

### *Improved Project Costs and Increased Productivity*

TRIOSE manages and controls the flow of materials onto and around the site by coordinating shipment release, carrier booking, end delivery, warehousing, staging and/or installation. All the respective functions of claims, freight payment, auditing, reporting, etc. are managed also by TRIOSE.

Through real-time satellite and GPS communication, TRIOSE proactively manages on-time pickup and delivery service. Additionally, TRIOSE can provide in-transit storage using our network of asset-based service providers.

- Reduced Transportation Costs
