

ECO-FRIENDLY, SUSTAINABLE SHIPPING SOLUTIONS

MARGINS SHRINKING?

TRANSPORTATION COSTS IMPACT MORE THAN JUST YOUR BOTTOM LINE

High value medication costs, providing the highest level of service to patients, and maintaining drug integrity has increased the cost of pharmaceutical operations significantly. Using untested or unverified packaging material can put your patients and pharmacy at risk. Researching and vetting these vendors is time-consuming and places additional strain upon your pharmacists and supply chain.

CLEAN UP SUPPLY CHAIN TOGETHER

One of the largest unseen costs to the environment is the amount of waste created for packaging medical materials. Disposal of this waste is not easy. What's even more difficult is managing to balance an eco-friendly supply chain along with the mandate to save lives.

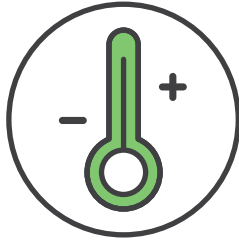

A BETTER WAY FORWARD

TRIOSE's **PHARMACY^{iQ}** solution gives you access to KTM's biodegradable, sustainable shipping solution, Green Cell Foam! Green Cell Foam packaging solutions fit your pharmacy's unique needs, protecting your most at-risk shipments from costly damage and claims.

ABOUT GREEN CELL FOAM

Made in the United States, Green Cell Foam is food-grade corn starch that is light-weight, but durable for packaging. Providing shipping coolers and protective packaging designs, Green Cell Foam is the most used, consistent bio-based shipping material available. Instructions on disposal methods are provided with the packaging material for easy clean-up when no longer needed.

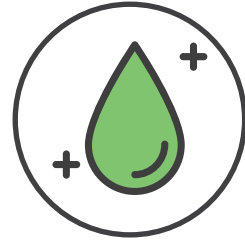

PROTECT YOUR PATIENT'S SHIPMENTS AND THEIR FUTURE

Temperature and
moisture control

Leader in eco-friendly
packaging

Easy clean up –
Just add water!

STEPS

1

Contact TRIOSE for
additional information

2

Schedule shipment of
Green Cell Foam

3

Change the way you
impact the world
around you

Your TRIOSE team is ready to discuss all aspects of Green Cell Foam use in your pharmacy. Your patients and the environment will see the commitment to change on your first shipment.

To find out more information about Green Cell Foam or TRIOSE's **PHARMACY^{iQ}**, contact Mark Lutcavish at 1.866.241.2268 ext. 257 or email m.lutcavish@triose.com
